Inside the Big Tent

Insight
Glenn Brunkow,
Pottawatomie County farmer
and rancher

We just completed the American Farm Bureau Federation (AFBF) 102nd Convention, virtually. It went as well as it could have, there were a few things that were a little wonky. By the way, wonky is my new favorite pandemic word and really is a good descriptor of most of what has happened because of the pandemic. But I digress, the annual meeting and convention was different, but it did bring a certain amount of normalcy in a time that is anything but

normal.

It was good to hear debate on issues surfaced by our members from across the United States. I find these debates fascinating. I know, I am weird that way but often I learn about issues facing different regions I did not know about before. I also find out different regions can view the same issue very differently, and they may even be on opposite sides of the same issue. It can lead to a lot of debate and discussion, but that is what makes Farm Bureau so great.

I have heard Farm Bureau described as a “big tent”

organization, and I think that is a great way to describe our organization. It would be my wish that all of you could attend an AFBF convention so you could get a taste of all the types of ag, viewpoints and opinions we represent. Every commodity and method of production have a place at the table. All the policy in our book comes from grassroots members in counties in all 50 states and Puerto Rico. Every piece of policy we have at the state or national level started in a county board meeting somewhere, and that is something to be proud of.

That is why I say listening to the debate and discussion from the business meeting made things seem just a little more normal. I must say my seat was more comfortable, the coffee was much better and cheaper but watching it all, by myself was not right and is something I hope we never do again. However, I could imagine myself back in that crowded convention room listening to the meeting, and that’s a good thing.

We are an organization that thrives on relationships, and I miss the conversations we did not have at our usual meetings. We have a lot of catching up to do when this is all over and we return to normal.

Virtually is not how we like or prefer to get our work done, but as all of us in agriculture know, the work must be done. I am proud of the way that we adapted and overcame the challenges this pandemic threw our way; I think we made the best out of a bad situation, and I applaud all who made it happen. It was not easy or natural, but we pulled it off. Until we beat this virus, and I know we will, we will have to embrace the new virtual normal even if it is a bit wonky.

KRC to Host “Pollinators on the Plains” Virtual Event to Kick Off 2021 Farm & Food Conference Series

Wichita, KS – The Kansas Rural Center (KRC) is excited to announce our Pollinators on the Plains conference to be held online on Friday, February 5, 2021, from 8:30 am – 4 pm CST. The virtual event will cover a range of pollinator topics, including beekeeping methods and strategies, innovative regional pollinator-based community initiatives, the intersection of pollinators with farming and ranching, and information on the impacts of pesticides on pollinators.

For a complete agenda and to register, please visit <https://kansasruralcenter.org/pollinators-on-the-plains/>.

To help offset the negative impacts of the pandemic, we are offering a 25% discount to attend the event. \$15 will get you a virtual seat at the conference, access to some presentations after the event, and a paper copy of KRC’s soon-to-be-published Plains’ Pollinator Resources: Keeping Bees and Protecting Pollinators in Kansas, which will be mailed to you in February. To register, please visit <http://bit.ly/KRCbees2021>.

For students, beginning farmers or beekeepers, and anyone for whom the registration fee is an obstacle, scholarships are available. Please fill out this scholarship form at <http://bit.ly/KRCbeesapplication>, or contact us at info@kansasruralcenter.org.

A keynote presentation will be given by Sarah Red-Laird, Executive Director of Bee Girl, a nonprofit organization whose mission is “to educate and inspire communities to conserve bees, their flowers, and our countryside.” Red-Laird is also Northwest Farmers Union president. Red-Laird will talk about utilizing regenerative practices in her beekeeping operation, and the intersection between bees and grazing lands.

Dr. Leo Sharashkin, editor of “Keeping Bees with a Smile” and founder of Horizontal Hive, will talk about natural beekeeping and his unique hive design and method for capturing swarms to populate his hives.

Breakout sessions will include beginning beekeeping basics with Becky and Steve Tipton, Master Beekeepers and longtime leaders in both Northeastern Kansas Beekeepers Association and

Kansas Honey Producers Association. The Center for Rural Affairs will discuss their project involving a variety of alternate hive types, and North American Pollinator Alliance founder, Jorge Garibay, will discuss his unique hive system and vision for repopulating Kansas ag lands with honeybees.

Daniel Raichel, NRDC Staff Attorney, Pollinator Initiative, Wildlife Division, will talk about the impacts of pesticides on pollinators and how some Midwestern communities are being impacted by pesticide-treated seeds.

Candy Thomas, USDA-NRCS Soil Health Specialist for Kansas and Nebraska, will talk about agricultural practices that are beneficial for pollinators, and a panel of farmers and native plant specialists will discuss pollinator habitat at different scales.

Alfonso Leyva, who works for the City of Manhattan, Kansas, will discuss the city’s Pollinator Pockets project, which aims to increase pollinator habitat within the city by adding or increasing pollinator plants throughout the park system in Manhattan. Dr. Marion Pierson and Brian Reeves, from the MO Hives

KC project, will give an overview of their project which turns vacant lots into apiaries.

Pollinators on the Plains is the kick-off event for KRC’s 2021 Farm & Food Conference series. Our annual in-person Farm & Food Conference was cancelled in 2020 due to the pandemic. In order to provide as much in-depth information and interaction as possible during this continued time of limited contact, we are choosing to host a series of online events, each focusing on a particular topic. This will allow us to get together and to dive deeper on a number of topics. We hope that it might be possible to meet in person by November 2021 and are keeping all options open.

In the meantime, please plan to join us for:

Pollinators in the Heartland - February 5, 2021

Local Food Systems & Farm to School – May 2021

Soil Health to Human Health – July/August 2021

An NCR-SARE project track will be included in the later events.

For more information as we have it, please visit <https://kansasruralcenter.org/2021-conference/>.

LEGAL NOTICES

(First Published in the Greeley County Republican, January 13, 2021) 2t

NOTICE OF NON PUBLIC ANNUAL MEETING OF THE GREELEY COUNTY CONSERVATION DISTRICT

To all qualified electors residing within the boundaries of the Greeley County Conservation District, notice is hereby given that pursuant to K.S.A. 2-1907, as amended, on the 2nd day of February, 2021, promptly at 6:00 p.m., the 73rd Annual Meeting of the Greeley County Conservation District will be held at the Ocie Neuschwander Meeting Room, Tribune, Kansas.

The meeting agenda shall include the following business items:

ONE
The supervisors of the Greeley County Conservation District shall make full and due report of their activities and financial affairs since the last annual meeting.

TWO
They shall conduct an election by secret ballot of the qualified electors, there present, for two supervisors to serve for a term of three (3) years from date of said meeting.

The term of Jeff Nolan and Alan Wineinger will be expiring.

All in the Greeley County and all in the State of Kansas.

By
Kenton Mangan, Chairperson
Greeley County Conservation
District

ATTEST: Jennie Koehn,
Greeley Co. Conservation
District Manager
