Kansas Common Sense to go to Brazil

WASHINGTON, D.C. — U.S. Senator Pat Roberts, R-Kan., Chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, applauded the Trump administration announcement that Brazil has implemented its long-promised 10 percent tariff rate quota (TRQ) of high-quality wheat.

“At a time of low prices and trade uncertainty, this welcome news to the wheat growers, especially to the farmers growing wheat for U.S. markets, is welcome news to U.S. wheat. Brazil has faced a 10 percent duty since the July 2018 announcement, until today’s announcement, exports of U.S. wheat to Brazil have faced a 10 percent duty. In February, Senator Roberts urged the U.S. Trade Representative to take action on this very matter. Roberts’ staff worked closely with Kansas farmers to advance this issue.

The opening of the Brazil market (the TRQ) represents a big win challenging to implement for Kansas wheat farmers,” said the Kansas Association of Wheat Growers. “Due to the efforts of U.S. Wheat Associates and USR representatives working directly with Brazil on this issue, our farmers will now have the opportunity to compete on an even playing field, giving Brazilian millers and bakers high quality wheat that’s an ideal fit for their market.”

Retail and commercial wheat sales collections were also ahead of the estimate. Retail sales collections were $72.7 million or 30.6 percent ahead of the estimate. These collections were $69.0 million more than October of Fiscal Year 2019. Compensating use tax collections were $26.2 million or 34.6 percent ahead of the estimate. These collections were $11.0 million more than October of Fiscal Year 2019. The joint inquiry included a provision that would grant NASA the 10 percent duty.
